Preface

This proceedings contains papers presented in the fifteenth annual Kansas State University Conference on Applied Statistics in Agriculture, held in Manhattan, Kansas, April 27-29, 2003. The purpose of the conference is to provide a forum for discussion on the application of statistics to problems in agricultural sciences. The papers presented at the conference and included in the proceedings are intended to provide information to both the statistician and agricultural researcher on current issues of agricultural and general statistical interest.

The keynote speaker was Marcia Gumpertz.

Each contributed paper was refereed before being accepted for publication in this proceedings. Papers were accepted for publication based on their interest, relevance, innovation and application to the agricultural sciences and statistics.

George A. Milliken, Ph.D.
Proceedings Editor
The Kansas State University Conference on Applied Statistics in Agriculture is successful because of the continued involvement of our presenters and participants. In addition, our conference depends on the efforts and support of a number of people and organizations. Special recognition and thanks are extended to the following.

**Department of Statistics, Kansas State University**
- John E. Boyer, Ph.D.
- Department Head

**Organizing Committee**
- George A. Milliken, Ph.D.
- Dallas E. Johnson, Ph.D.
- Jane M. Cox
- Karen McLaughey

**Proceedings Editor**
- George A. Milliken, Ph.D.

**Special Events Committee**
- Jane M. Cox

**Manhattan Holiday Inn / Holidome**

**Conference Sponsors**
- American Statistical Association
- Eli Lilly & Company
- Pfizer Inc
- Pioneer Hi-Bred International Inc
- Quintiles, Inc
- USDA-ARS

**Referees**
- Zhanglin Cui
- Ed Gbur
- Dave Marx
- George Milliken
- Ben Mullinix
- Tim O'Brien
- Meihua Qiao
- Josh Tebbs
- Dawn Van Leeuwen
- Dale Van Vleck
- Linda Young
- Alan Zimmerman
Table of Contents

Data Structure With Respect to the Main Effects Model: A Discussion Motivated by a Meta-Analysis Data Set
D.M. VanLeeuwen, D.S. Birkes, C. Clary and C. Robinson ............................... 1

M.R. Beckman and W.W. Stroup ................................................................. 15

New Tools for New Times
T.C. Nelsen and D.E. Palmquist ................................................................. 36

Clustering Environments Based on Crossover Interactions and Using Graphical Approaches to Visualize Clusters
K. Russell, K. Eskridge, and D. Travnicek ..................................................... 45

Interval Mapping for Autopolyploids
D. Cao, B.A. Craig, and R.W. Doerge ........................................................... 60

Quadratic Model to Estimate the Doses Causing the Highest Cholesterol Concentration and the Same Cholesterol Concentration as Control Group
W. Zhang, S. Nissen, D. Beitz and P. Dixon .................................................... 73

Comparing Estimation Procedures for Dose-Response Functions

Effect of Genetic Potential and Feed on Growth of Young Bulls for Future Breeding
B.G. Mullinix, W.E. Neville, and J.F. Baker .................................................... 100

A Simulation Study of Exponential Semivariogram Estimation
E.E. Gbur, B.A Craig and H. Zhang ............................................................... 121

The Probability of Preponderancy: An Alternative to the Intraclass Correlation
I.R. Harris and B.D. Burch ............................................................................ 137

Cubic Splines for Estimating Lactation Curves and Genetic Parameters of First Lactation Holstein Cows Treated with Bovine Somatotropin
Variance Testing with Simplicial Data Depth
K.J. McGaughey and G.A. Milliken ........................................ 164

A Bayesian Approach to Assessing Lab Proficiency with Qualitative PCR Assays Used to Detect Biotech Traits in Crop Seed
K.M. Remund and G.D. Austin ........................................ 175

Unreplicated Variety Trials: Effects of Check Plot Density and Fixed Versus Random Treatments
T. Maas, J. Stafford, B. Sebolai, D. Marx, D. Travnicek, and J. Pedersen .......... 180

Detection Power of Random, Case-Control, and Case-Parent Control Designs for Association Tests and Genetic Mapping of Complex Traits
G. Shu, B. Zeng, and O.H. Smith ........................................ 191

Using the Bi-logistic Model to Estimate Body Temperature in Feedlot Cattle
M. Kerek, A.M. Parkhurst, and T.L. Mader ................................ 206

Hotelling's T^2 Approximation for Bivariate Dichotomous Data
P. Singh, I. Khamis and J. Higgins ........................................ 218

Simple Step-Stress Testing with Covariate in Agriculture
L. Cleair, I. Khamis, and M. Al-Haj Ebrahem ............................ 227

Comparing Measuring Methods Using the Sensitivity Ratio: An Application to Resistance Screening in Soybeans
G. Madisa, K.M. Eskridge, K.S. Powers, J.R. Steadman, R. Higgins, and C. Bellows ...................................................... 237

Threshold Sire Models for Estimating Genetic Parameters for Stayability in Beef Cows
G. Martinez, S.D. Kachman, and L.D. Van Vleck .......................... 248

Suggestions for Presenting Kriging Results
D.W. Meek and T.J. Sauer .................................................... 258

Statistical Analysis of the Effects of Mixing Potato Varieties on Late Blight

Comparing Correlated Parameter Estimates for Nonlinear Pet Model
Modeling and Design to Detect Interaction of Insecticides, Herbicides and Other Similar Compounds
T.E. O'Brien ................................................................. 303

List of Attendees .......................................................... 322
