## Designation of certain filamentous fungal genes identified by molecular cloning.

### Abstract

In a recent review entitled "The structure and organization of nuclear genes of filamentous fungi" (Gurr et al., 1987) we gave conventional designations to certain hitherto undesignated genes of filamentous fungi.

Designation of certain filamentous fungal genes identified by molecular cloning.

In a recent review entitled "The structure and organization of nuclear genes of filamentous fungi" (Gurr *et al.*, 1987) we gave conventional designations to certain hitherto undesigned genes of filamentous fungi. These are genes which have been cloned and identified by DNA sequencing, not by classical genetics analyses, and consequently, were not given gene symbols.

We contacted the appropriate research groups and their respective workers and agreed upon conventional gene symbols and designations. These are outlined in the table below.
