The *Journal of International Agricultural and Extension Education (JIAEE)* is the official refereed publication of the Association for International Agricultural and Extension Education (AIAEE). The purpose of the *JIAEE* is to enhance the research and knowledge base of agricultural and extension education from an international perspective. Acceptance rates for the past five volumes are: Volume 21 = 13%. Volume 22 = 18%. Volume 23 = 12%. Volume 24 = 18%. Volume 25 = 9%. Volume 26 = 26%. Volume 27 = 17%. Volume 28 = 22%. Volume 29 = 18%.

Articles intended for publication should focus on international agricultural education and/or international extension education. Articles should relate to current or emerging issues, cite appropriate literature, and develop implications for international agricultural and extension education. **Manuscripts, or portions of manuscripts, must not have been published or be under consideration for publication by another journal.**

For publication in the *JIAEE*, manuscripts must pass the *JIAEE's* **double blind, referee process**, where peer reviewers evaluate manuscript content and ensure readability. Reviewers are selected from the AIAEE membership. In the double blind, referee process, all references to authors are removed before the manuscript is sent to reviewers. Articles may be submitted for peer review a total of *three times* before they are no longer acceptable for publication in the *JIAEE*. Failure to meet the submission formatting guidelines will result in an automatic first rejection.

Two different types of articles are solicited for the *JIAEE*: Feature Articles and Research Notes.

Feature Article

A Feature Article should focus on philosophy, current or emerging issues, and the methodology and practical application of specific research and appropriate technologies, which have implications for developed and developing countries. Conceptual/Theoretical and Methodological manuscripts are also encouraged as submission for feature articles. If applicable, a feature article should report the findings from a fully investigated study. Feature articles are **no longer than 20 double-spaced pages, excluding references.**

Research Note

A Research Note is a concise but complete description of a limited investigation that will not be included in a later manuscript. It serves one of the following purposes: (1) presents initial proof-of-concept results on new ideas or program evaluations, timely issues, or innovative approaches; (2) reports replications or extensions of previously published research that does not merit another full-length manuscript yet provides results that contribute to a greater understanding of the phenomena under study. Research Notes are **no longer than 10 double-spaced pages, excluding references.**

From the Editor

As 2023 draws to a close, so does my time as the Executive Editor for JIAEE. I have served for the past six years in both the managing and executive editor roles and have had the opportunity to participate in the evolution of our journal as we have made significant changes during this time. We have converted to an open-access journal with our publishing partner, New Prairie Press and our partners at Kansas State University who have gone above and beyond during the transition period that extended well beyond what anyone anticipated. Publishing new issues of the journal has gone smoothly and has increased our reach and readership. We are very pleased with the outcomes. Converting our old issues and maintaining the DOI numbers proved to be more of a challenge, but we are confident that process will be completed by the time our association meets this spring in Florida. I appreciate everyone's' patience as we have individually converted over 400 articles to the new format.

During my time on the journal staff, we also dealt with the impacts of COVID and were able to provide timely research on the pandemic's impact on our profession and our ability to effectively continue with international work. I believe we came out of the pandemic stronger and more resilient than when it began.

Finally, nothing happens in a vacuum. I have many people to thank and will probably miss a few. Before the individuals however are the people who make this journal work, without whom it would never see the light of day. Those of you who have reviewed and continue to review articles are the most important human capital for the life of JIAEE. Without your unselfish and consistent work, we would not have papers to publish. Thank you for your time and efforts, both past and future. I truly appreciate each and every one of you.

And finally, to the people who worked hand-in-hand over the years on the journal staff. Kris Haines, Alexa Lamm, Roger Hanagriff, Mary Rodriguez, John Dias and Ryan Otto. I could never have managed any of this without you all and I appreciate each of you very much. In addition, you are all great people and great friends and I think about you every time I see the 2,660 emails in my JIAEE inbox.

I leave the daily management of the journal in great hands as Mary and John assume 100% of the heavy lifting but I will still be around as past editor for a few more years. Thanks to all who make the journal a great outlet for our very specialized little corner of the world and for helping to make the world a better place.

Sincerely,

A handwritten signature in black ink that reads "Michel Todd Brashears". The signature is written in a cursive, flowing style.

M. Todd Brashears, Professor
Executive Editor, *Journal of International Agricultural and Extension Education*
