To order hard copies of the Field Journals, go to shop.symphonyintheflinthills.org.

The Field Journals are made possible in part with funding from the Fred C. and Mary R. Koch Foundation.

This Event is brought to you for free and open access by the Conferences at New Prairie Press. It has been accepted for inclusion in Symphony in the Flint Hills Field Journal by an authorized administrator of New Prairie Press. For more information, please contact cads@k-state.edu.
The Kansas prairies are as mysterious and moody as the sea in their loneliness, yet we graze them and plow them and mark them with roads and do not see them.

— William Allen White
In little more than a century, we have nearly destroyed an ecosystem that remained relatively unchanged for millennia. In the industrial age, people no longer had to go to the water — it came to them. Suddenly, every place was habitable — from barren desert to sprawling city. Creeks, rivers, and sacred springs be dammed! Rural prairielands would be consumed by reservoirs engineered to tame record floods and quench post-war thirsts. Through pipes and channels, we bent water to our will. But there was a price to pay. What was once a boundless Sea of Grass became fragments put asunder by roads, water-plundering trees, and a network of pipe to feed a society with an addict’s appetite for water. Tilled soil filled the reservoirs, and invasive plants robbed the soil. In a landscape born of fire and water, this was tempting fate. We must reverse course before it is too late.
