The Field Journals are made possible in part with funding from the Fred C. and Mary R. Koch Foundation.

This Event is brought to you for free and open access by the Conferences at New Prairie Press. It has been accepted for inclusion in Symphony in the Flint Hills Field Journal by an authorized administrator of New Prairie Press. For more information, please contact cads@k-state.edu.
THE FLINT HILLS: ROOTED IN STONE

With appreciation and thanks, the Field Journal is made possible in part by a generous grant from the Fred and Mary Koch Foundation.
Cathy Hoy, a devoted and loving wife and mother, served as an ardent supporter and protector of the Flint Hills. Reserved but eloquent and deliberate in speaking her mind, Cathy was equally graceful on horseback, on the dance floor with husband Jim, or in a heartfelt discussion of her values. Among her many contributions to this Field Journal was the vision and accomplishment of securing the Library of Congress designation for the series. Ad astra, dear Cathy.
OUR MISSION

Heighten appreciation and knowledge of the Flint Hills tallgrass prairie

Symphony in the Flint Hills, Inc., works to build awareness for the last stand of tallgrass prairie. Those of us who live in the Flint Hills know this: the land dictates the terms and beauty of our lives, and our culture is shaped by this landscape. Its stone, soil, flora, and skies above pull on our souls and care for us, and we are called to care for this place in return.

We answer this call to stewardship with education. As the premiere Kansas arts organization that directly engages with the land, we collaborate with musicians, artists, historians, scientists, and community members to provide transcendent experiences that open our minds to both the traditions of today and the future of the Flint Hills of tomorrow.

The bedrock of our work is found here in our annual Field Journal. In this issue we explore the theme of Stone. The flinty stone underneath the hills kept them from being plowed. In excavating them, we built schools for our children, barns for our animals, and halls for our government. Today the beauty of limestone attracts visitors from all over the world to marvel at the fortitude of people who carved tools, erected fences, and made a life from this earth.

At Symphony in the Flint Hills, we envision a future where our efforts inspire people to strengthen the Kansas prairie by sustaining the region’s unique culture and landscape. You can learn about ways to join us at symphonyintheflinthills.org.
As the Major Presenting Sponsor for Symphony in the Flint Hills through 2021, BNSF Railway is honored this year to celebrate Stone in the Flint Hills. Shallow deposits of limestone, the foundation rock in the Flint Hills, are a critical element of prairie conservation, thus preserving the rich ecological diversity. BNSF’s commitment is strong in Kansas, partnering to build the state’s economy by accessing markets around the world. BNSF is proud to partner with Symphony in the Flint Hills to educate and celebrate the role of stone in protecting the prairie.

Some Treasures from the Tallgrass Prairie
Steve Snell
If there’s a defining feature of the Flint Hills, it’s the rock that underlies the soil—the limestone and flinty chert that saved the uplands from the settler’s plow and thus saved North America’s last intact swath of tallgrass prairie.

We’re celebrating this stony underlayment in the first two sections of this Field Journal with articles about stone—what’s been built with it, how it got here, what it’s composed of, and how it has impacted life today in the Flint Hills. Included are Q&A interviews with two Flint Hills residents whose life work is derived from the stone.

The third section of the Field Journal is devoted to the area surrounding Wabaunsee and neighboring counties. Through time, early residents had to be tough as stone as they carved out lives for themselves in these rugged Flint Hills.
