Conceptions of space, before realization, originate in the mind. Existing between one’s reason and one’s intuition are a collection of memories, images and data.

Process enables these conceptions to transcend materiality and define meaning, thus altering perceptions of space and their translation into the physical environment.

...Meaning is found, discovered, and identified, rather than projected. The methodology of these explorations bypasses the notion of aesthetics: beauty resides in the very act of discovery, rather than in the externalized object. Aesthetics are transformed into material and embodied processes of making...the greatest liberty is born of the greatest rigor.

—Juhani Pallasmaa
