Preface

This publication contains papers presented at the second annual Kansas State University Conference on Applied Statistics in Agriculture, held in Manhattan, Kansas, April 29 through May 1, 1990. The purpose of the conference is to provide a forum for discussion on the application of statistics to problems in agricultural sciences. The papers presented at the conference and included in this proceeding are intended to provide information to both the statistician and agricultural researcher on current issues of agricultural and general statistical interest.

The keynote speaker was Ramon C. Littell, Ph.D. from the Department of Statistics, Institute of Food and Agricultural Sciences, University of Florida. Dr. Littell's paper is a discussion of current research in the area of repeated measures analysis.

Each contributed paper was refereed before being accepted for publication in this proceedings. Papers were accepted for publication based on their interest, relevance, innovation, and application to the agricultural sciences and statistics.

Special acknowledgement and appreciation is extended to Cyndi Slover, Jane Cox, Rebecca Schwenke, and Janet Milliken for there efforts in helping to organize the conference and prepare this proceedings.
