Radford, A. Gene-enzyme correlations in Neurospora

The following list is a revision of the correlations listed in Radford (1976), C. R. C. Handbook of Biochemistry, 3rd Edition. Other recent partial lists are given in Mishra (1977), Advances in Genetics 19, and Fincham, Day and Radford (1978), Fungal Genetics, 4th Edition.

In not all cases are the genes listed the actual structural genes for the enzymes, some being regulatory, and some others possibly regulatory.

Where possible, references are given to the bibliographies of Bachmann and Strickland (1964) and Bachmann (1971). Only references after 1970, and occasional references before that date but not listed in those bibliographies, are listed in full at the end of this paper.
