I compiled a list over a period of 3 years while editing manuscripts dealing with more than 20 subjects in agriculture and related areas. The list includes acronyms of all categories defined above that are used frequently in different subject areas. The same acronym sometimes is used for more than one term but in different subject areas. Less frequently, two acronyms are used for the same term. To avoid repetitions, some secondary meanings of acronyms are shown in parentheses. Additional words to clarify the meanings are shown in brackets. The list does not include acronyms made up for specific studies, those for agencies (NSF) or companies (IBM), or chemical abbreviations (N for nitrogen). Capitalized terms are proper nouns, such as the names of industry or government programs, procedures, systems, or people or trade names. All agricultural areas cannot be represented equally, because I saw fewer acronyms from some areas. Also, printing limitations determined the final number of acronyms that could be included in this publication. This is not an exhaustive list, but I hope it will be useful to editors, county agents, producers, and anyone else who reads agricultural literature.
I compiled a list over a period of 3 years while editing manuscripts dealing with more than 20 subjects in agriculture and related areas. The list includes acronyms of all categories defined above that were used at least five times in different subject areas. The same acronym sometimes is used for one term but in different subject areas. Less frequently, two acronyms are used for the same term. To avoid repetition, some secondary meanings of acronyms are shown in parentheses. Additional words to clarify the meanings are shown in brackets. The list does not include acronyms made up for specific studies, those for agencies determined the final number of acronyms that could be included in this publication. So this is not an exhaustive list, but I hope it will be useful to editors, county agents, manuscript authors, and anyone else who reads agricultural literature. Capitalized terms are proper nouns, such as the Latin name of fungus. The acronyms made up for specific studies, those for agencies included in this publication. So this is not an exhaustive list, but I hope it will be useful to editors, county agents, manuscript authors, and anyone else who reads agricultural literature.

**Acronyms**: I compiled a list over a period of 3 years while editing manuscripts dealing with more than 20 subjects in agriculture and related areas. The list includes acronyms of all categories defined above that were used at least five times in different subject areas. The same acronym sometimes is used for one term but in different subject areas. Less frequently, two acronyms are used for the same term. To avoid repetition, some secondary meanings of acronyms are shown in parentheses. Additional words to clarify the meanings are shown in brackets. The list does not include acronyms made up for specific studies, those for agencies determined the final number of acronyms that could be included in this publication. So this is not an exhaustive list, but I hope it will be useful to editors, county agents, manuscript authors, and anyone else who reads agricultural literature. Capitalized terms are proper nouns, such as the Latin name of fungus.
