

Dr. Losinski's book *Special Education in Secondary Schools* provide a unique outlook on educating students with behavioral and learning differences in middle and high school. The book provides a comprehensive look at strategies for teaching in the content area, co-teaching, transition, and behavior. Dr. Losinski's book present the research and steps for implementing various effective strategies. *Special Education in Secondary Schools* also presents an honest look at the limited research availability in some areas. The examples provided are humorous and engaging and allow readers to understand the real-life needs of secondary students receiving special education services. A important work appropriate for any secondary methods course.
